**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Van Ess 6007554.

Van Ess discloses a shaft (17) having a proximal end and a distal end, wherein an opening (near 35) is formed within the shaft and adjacent to the distal end; a fitting (the casing containing elements 16 and 18) having proximal and distal ends and a groove (element 18) formed therein, said groove configured to receive at least one length of suture, the distal end of said fitting configured to engage a knot; a cutting member (the edge of 17); a suture retaining member (the distal edge of 18), and a handle assembly disposed on the proximal end of said shaft, wherein said handle includes at least two levers, wherein one lever is in communication with said cutting member (14) and the other with said suture retaining member (13). A lever is taken to mean a projecting handle used to adjust or operate a mechanism.

Regarding claim 22, the spring is the biasing member.

***Allowable Subject Matter***

Claims 3-7 are allowed. Claims 23-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 3731

Regarding claim 3, the cited prior art does not contain a suture trimmer with a slideably disposed cutting member and suture retainer, with a shaft having a groove that is in communication with another opening on the shaft.

Regarding claims 23-25, if element 12 is considered to be the shaft and the cutting member 31, the blade is slideably disposed in the fitting not the shaft.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
